DETAILED ACTION

Response to Amendment

1. The following office action is responsive to the action received on 8/14/2007 and the updated drawing received on 9/17/2007. The updated drawings are accepted.

Allowable Subject Matter

2. Claims 1-7 and 10-21 are allowed.
3. The following is an examiner's statement of reasons for allowance:
The claimed invention distinguished over the prior art of record through recitation of an image sharpness enhancement process that includes expanding a color distribution in the direction of a first primary component without expanding the distribution over the 2nd and 3rd primary component axes based on an enhancement parameter.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daley et al. (US 5, 987,169) does teach filtering color fringing in an image by maintaining a luminance value and restricting the two chrominance values. While somewhat conceptually related, this is not equivalent to the applicant's technique of enhancing a color axis of interest while preserving the other two axes.
